WORK EXPERIENCE

Special Program Assistant | Interactive Media Management Program, Algonquin College, Ottawa, ON | Jan 2023 – Present

- Collaborate with instructors and help in coordinating the Interactive Media Management program, encompassing front-end and back-end development.
- Provide guidance and one-on-one assistance to students in front-end technologies such as HTML, CSS, JavaScript, as well as back-end technologies like databases, server-side languages, and frameworks.
- Review and provide feedback on student projects, assessing the quality of code, functionality, and user experience.
- Collaborate with students on team projects, fostering effective communication, collaboration, and problem-solving skills.

Web Designer | TrickyDesign, Kurukshetra, India | July 2018 – Dec 2020 | Feb 2022 – May 2023

- Consulted with clients to understand their website requirements and preferences, ensuring their satisfaction with the final product.
- Created visually appealing website designs based on client specifications, incorporating elements such as color, font, and style to align with their branding and aesthetic preferences.
- Developed mock-ups and test pages to display the website's functionality and gather feedback from clients, focusing on intuitive user experiences.
- Implemented front-end development techniques to transform design concepts into fully functional websites using HTML, CSS, and JavaScript.
- Ensured that websites were designed in accordance with the client company's brand image, target audience, and goals, contributing to their overall success in the online space.
- Conducted thorough testing to ensure the functionality and stability of websites across various devices, including desktop, mobile, and tablet, optimizing responsive design.

AI/PM Researcher | Stonemeadow Consulting Ltd., Ottawa, ON | Jan 2020 – April 2020

- Collaborated closely with the project sponsor, project manager, and team to successfully deliver the project predictor tool within strict deadlines.
- Prepared comprehensive project documentation, including deliverables, project scope, resource assignment plan, and project release schedule, ensuring clear communication and alignment among stakeholders.

- Conducted extensive research, documentation, and compilation of tasks required to develop the AI (Artificial Intelligence) logic for the project predictor tool, ensuring the implementation of innovative technology.
- Provided regular project status reports, including financial statements and budget allocation updates, fostering transparency, and enabling informed decision-making by other departments.

Videographer & Video Editor | Music & Beyond, Ottawa, ON | May 2019 – Aug 2019

- Recorded over 20 music-related events in Ottawa, capturing engaging footage.
- Set up shots based on production schedules, weather, and lighting conditions.
- Evaluated and selected scenes for pacing, entertainment value, and continuity.
- Utilized Adobe Premiere Pro for video editing, arranging footage, and adding effects.
- Used Adobe Audition for audio editing to ensure high-quality sound.
- Delivered final videos on time, meeting project deadlines.
